**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The Examiner regrets the delay in setting up the interference requested. However, upon careful review of claim 35, it was determined that there is language present therein that renders the claim scope indefinite. The Examiner has suggested herein changes to put claim 35 in allowable form such that the interference can be set up once corrected.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On lines 1-2 of claim 35, the language "about normal body temperatures" is considered to be indefinite because the "body" referenced is not defined. For example, it could be a human body, a black body, or the body of a cold-blooded animal; i.e. a variable temperature. For this reason, the claim language is considered to be indefinite. The Examiner suggests inserting "human" before "body" in order to overcome this rejection and pointing out where there is support for any such change to the claim language. It is noted that plural "temperatures" is set forth, but that this is common phraseology in the medical arts. However, it does not give clear antecedent basis to "body temperature" used later in the claim which is singular.

On lines 4 and 5 of claim 35, the use of "body temperature" is considered to be indefinite because there is no type of body referenced; see the preceding paragraph.

Art Unit: 3738

The Examiner suggests inserting "human" before each of these occurrences and pointing out where there is support in the original disclosure for any such change to the claim language.

On lines 10 and 11-12, "the predetermined fabricated diameter" lacks antecedent basis. The Examiner suggests setting forth a stent diameter earlier in the claim and changing "the" to ---a--- in order to overcome this objection.

### ***Allowable Subject Matter***

Claims 22-34 are allowed over the prior art of record save the outcome of the interference with US 5,827,321 to Roubin et al. .

Claim 35 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

### ***Conclusion***

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 of 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
